

Mahindra and RCPE Solar Light Project

Mahindra and Rotary District 9400 joined forces to provide Solar Lights to local matriculants from disadvantaged communities to facilitate their studies at night.

The Rotary Club of Pretoria East decided to make the matric pupils at Lesedi School in Donkerhoek the beneficiaries of this project. The handover of the lights, stationery packs and books for the school took place on Friday March 4.

Another 63 lights were allocated to RCPE for distribution to the Lethabong High School matric pupils between February 22 and 26.

The lights were collected from Johan Roets at Mahindra Silverton, our local sponsor who assisted with the handing over.

Many happy faces reflected the thankfulness of the learners.
