

ROTARY FAMILY HEALTH DAYS

2-4 October @ SKIELIK

RFHD is a leading Rotarian Action Group with the largest Rotary health program outside of Polio. The purpose of the RFHD is not only to provide health services to the rural areas, but in South Africa it also strengthens relationships between Provinces and Districts with Rotary Steering Committee and partners. A special RFHD data capturing form was designed for capturing statistics. Important information to gather is - how many Rotary Districts and Rotarians participate, at how many sites were health services provided and in how many provinces plus the number of individuals that benefitted from the health interventions over the three days.

It is vital to know how to complete the RFHD forms. The Rotary clubs in Pretoria held a special training session for RFHD data capturing. Training was also done via Skype.
