

Lego sets bring cheer

To mark the new year, 2020, the Care for Education organisation made a very generous donation of 89 individual Lego sets to the Louis Botha Children's Home this month. A conservative estimate puts the retail value of this gift at well over R20 000.

Aiden collected and delivered the boxes to The Louis Botha Children's Home. The management of the Home was amazed by the generosity shown and there was great interest and excitement in how the sets would be used. Manager Ancha is excited to see the children at play with the sets in due course.

LEGO Foundation

In the last quarter of 2015, PP Mariana, who was the club President then, met Brent Hutcheson, the representative of the LEGO Foundation and invited him to visit our club. On 29 February 2016 Brent was the guest speaker at the RC of Pretoria East and told us about the company and its activities in South Africa. This was the beginning of a long association which still bears fruit today.

Care for Education

The LEGO Foundation provides charity resources through Care for Education, a non-profit organisation (NPO), to children-in-need and schools-in-need, as well as effective training to the teachers to maximise the benefits of the resources in local communities. The local LEGO Foundation / Care for Education is dedicated to learning through play and empowering children to become creative, engaged, lifelong learners.
